## Coffee2u Refillable Nespresso® Coffee Capsules

Fits all Nespresso® machines with the exception of Nespresso®-Krupps machines with 1-pin notches (models F897, F896 & F893 - all produced before 2003). Not suitable for coffee makers with automatic capsules.

The Coffee2u refillable capsule is to allow you to use your choice of CounterRoast coffee in your Nespresso® coffee maker. You can now enjoy your favourite espresso blend in an economical & environmentally friendly way. If you follow these instructions correctly, the result will be a delicious cup of espresso with a great crema. The coffee used **MUST** have a fine, evenly ground texture, i.e. the granules must all be of the same size. It takes a little practice to learn to fill the capsules, but it's a skill that's easy to learn. Once you have got the hang of it after trying it a few times, you will be amazed by the result.

## How To Use the Coffee2u Refillable Coffee Capsules

- Scoop out the ground coffee with the capsule and make sure it is completely full.
- Using your finger, press the ground coffee firmly down into the capsule – the capsule should be firmly packed with ground coffee.
  - Pushing too hard can cause the coffee to be too compact while pushing too lightly can result in a weak cup of coffee.
- Click the capsule lid shut all the way round.
- Insert into the coffee machine with the hinge facing upwards.
- Run the machine on the espresso 1-cup setting.

After using the capsule, it is best to clean it immediately. The lid can be popped open and the ground coffee scooped or rinsed out. The capsule should then be thoroughly washed ensuring all filter areas are free from coffee. Before re-use, the capsule should be thoroughly dried.

## Problem Solving

- **Capsule does not release after use:** release by hand.
- **Weak espresso:** either too little coffee in the capsule, the ground coffee used was not fine enough, or too much water was run through the machine.
- **Coffee does not flow / machine automatically switches off:** the ground coffee used was either packed in the capsule too tightly or was not evenly ground. It could also be that the capsule used was not dry.

Please note that CounterRoast takes no responsibility for any damage which may be caused to your coffee machine when using these refillable capsules.
